Rationale:

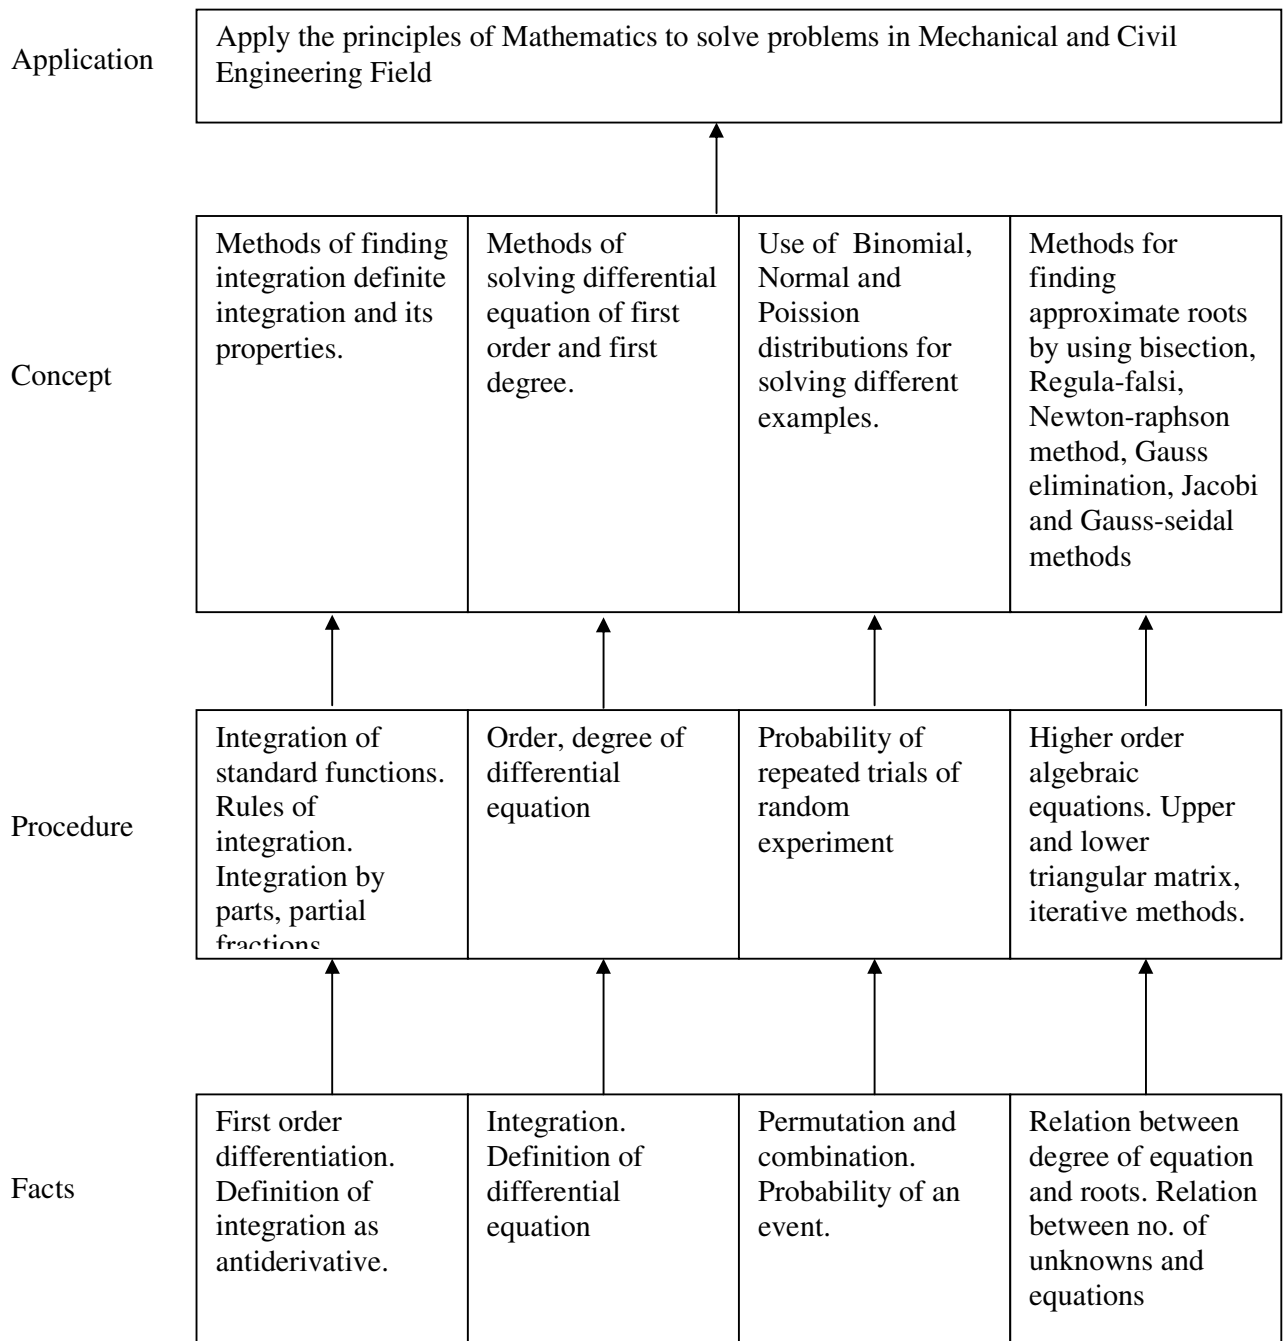

The study of mathematics is necessary to develop in the student the skills essential for studying new technological development. This subject introduces some applications of engineering, through which the student can understand the link of Mathematics with engineering principles.

Objectives:

Students will be able to:

1. Apply Mathematical term, concept, principals, and different methods for studying engineering subjects.
2. Apply Mathematical methods to solve technical problems.
3. Execute management plans with precision.
4. Use Mathematical techniques necessary for daily and practical problems.

Rationale:

Building construction is a core subject in civil engineering. This subject is intended for gaining useful knowledge with respect to facts. Concepts ,principles and procedures related to building construction system so that student can effectively plan ,execute building construction work and carry out repairs and maintenance of existing building with quality in construction.

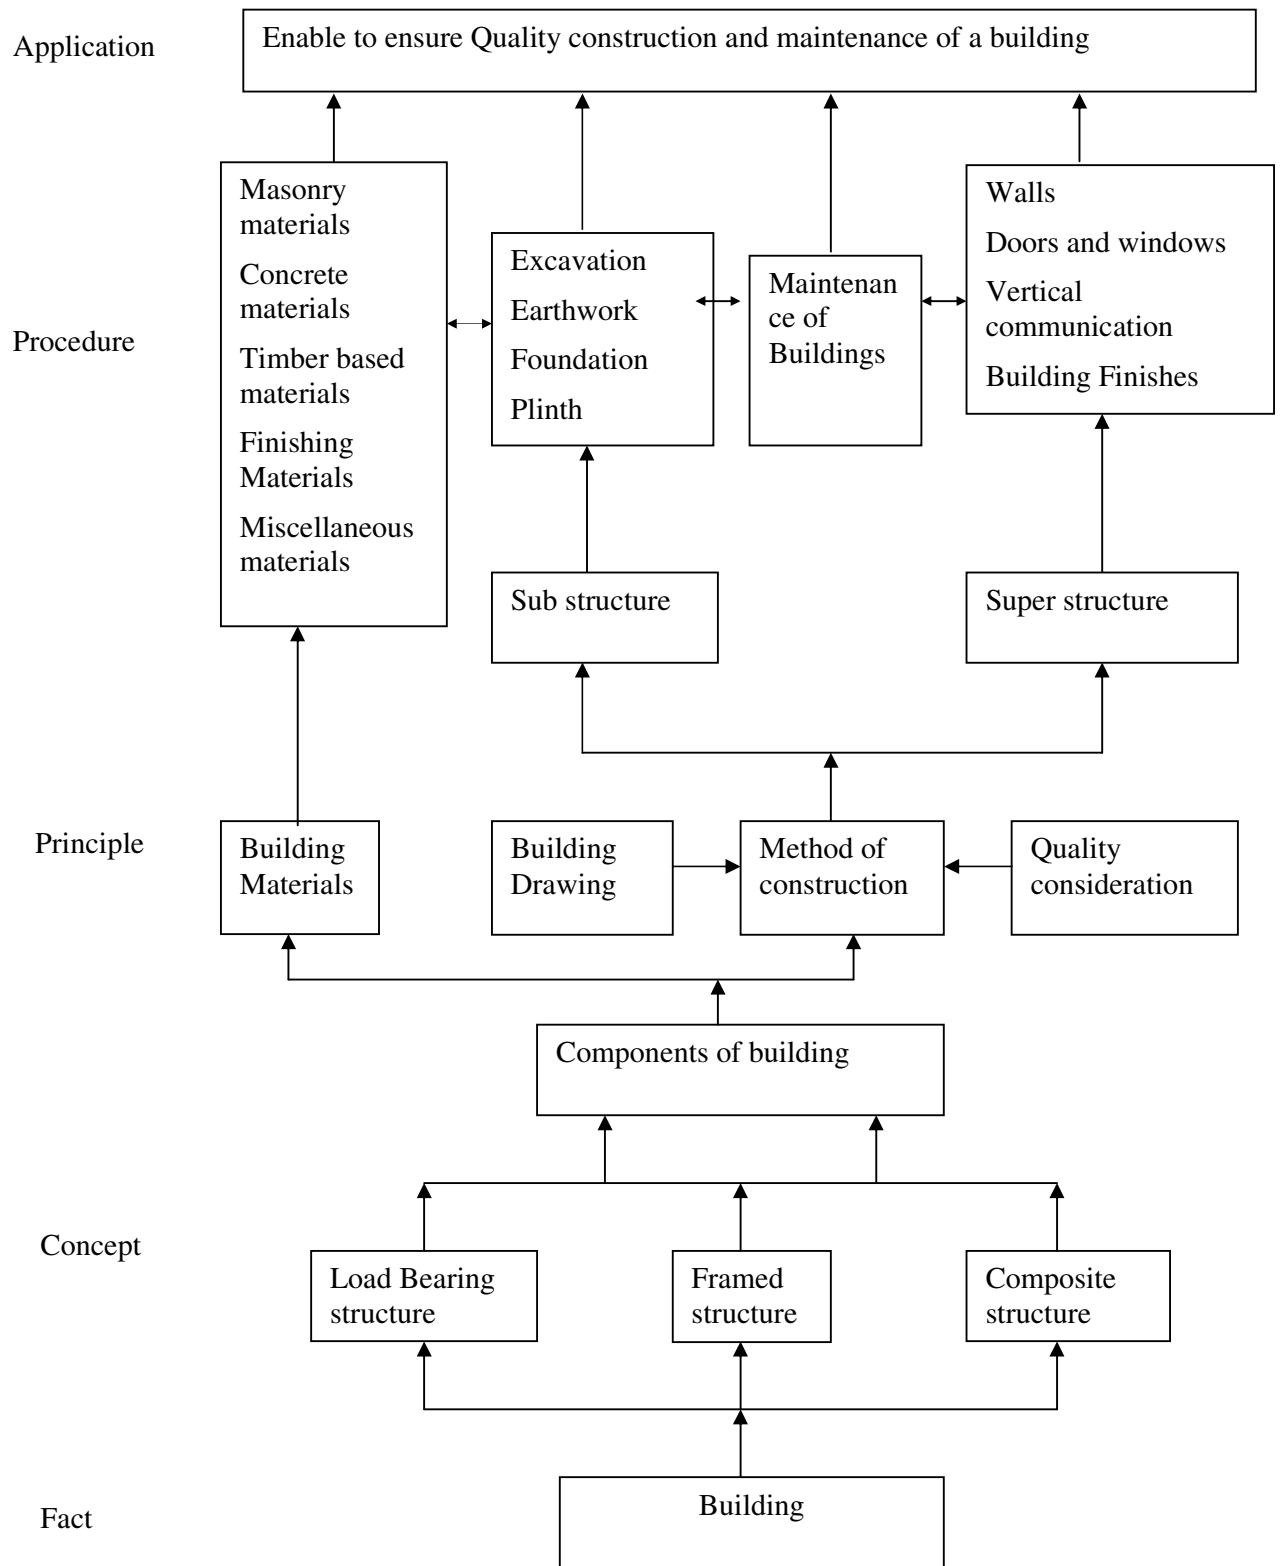

The subject helps to learn building materials required for construction. It provides necessary knowledge about properties, uses and market rates of building materials.

Objectives:

Student will be able to:

1. Identify various components of buildings and their functions.
2. Mark layout of building on ground.
3. Know the procedure for execution of various constructions activities.
4. Check line, level and plumb of various construction activities.
5. Prepare checklist of operations for supervision of various construction activities.
6. Identify & suggest rectification the various defects in civil engineering works.

CONTENT: PRACTICALS-

Skills to be developed:-

Intellectual skills:- students will be able to

- A) identify components of a building.
- B) differentiate and identify types of building materials.
- C) select appropriate material for building construction.
- D) supervise the building construction activities.

Motor skills :- students will be able to.

1. Mark layout of building on the ground.
2. Check and mark various levels in building.

List of practicals:

1. Preparing foundation plan and marking on ground layout of load bearing structure by face line method from the given plan of the building.
2. Preparing foundations plan and marking on ground layout of framed structure by face line method from the given plan of the building.
3. Checking and transferring line and level of plinth, sill, lintel, flooring, slab level of a building and writing report of the process.
4. Checking verticality (plumb line) of formwork for column, beam and wall at construction site and writing report of the process.
5. Laying and constructing the process of construction of brickwork and report writing of the process.
6. Observing the process of painting in residential / public building and writing a report with reference to process and type of paint selected.
7. Observing and writing report of the process of plastering.
8. Observing and writing report of the process of water proofing of terrace or basement.
9. Observing the models, specimen of building materials kept in the model room for few building items and writing a report for any five models/materials.

Rationale:

Drawing is basically the language of an engineer. It is a means of communication between owner, architect, engineer and contractor. Civil Engineering Diploma holder has to supervise various construction processes and execute civil engineering structures such as buildings, roads, railways, dams, bridges; etc. Civil Engineer has to convert design parameters, process details into pictorial views. Therefore he is required to understand and prepare the drawings. He has to interpret the drawings, so that, he can execute the works. Civil engineer should be competent to convert his ideas into the drawing. This helps him to transfer his ideas, thoughts to his subordinates on the site. Drawing makes his job simple and effective. Drawing helps in detailing the structures processes with quality parameters. Drawings are essential for drafting specifications and tender documents.

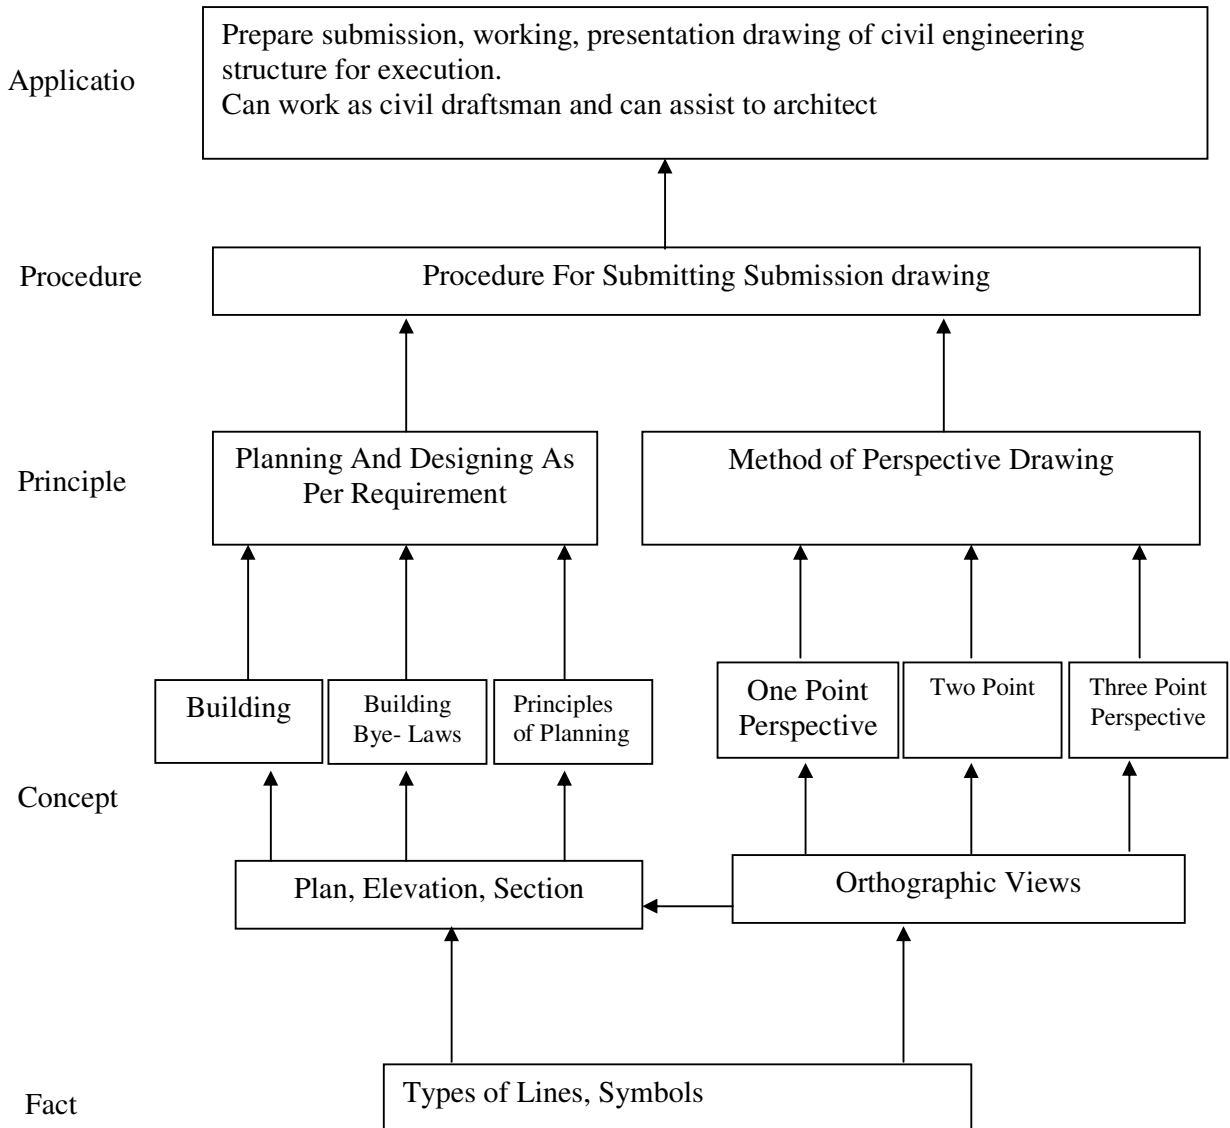

This subject is a core technology subject. The knowledge of this subject is useful for building construction, estimating and costing, design of structure, surveying, projects; etc.

Objectives:

The students will be able to –

- 1) Read, interpret and draw the building drawings.
- 2) Prepare submission drawings for the building.
- 3) Prepare working drawings for the building.
- 4) Plan various types of buildings considering the functional requirements.
- 5) Apply the building rules, regulations and byelaws.

Practical:

Skills to be developed:

Intellectual Skills:

1. Read and interpret the building drawings.
2. Plan residential and public buildings.
3. Apply the building rules, regulations and byelaws.

Motor Skills:

1. Prepare line plans of Residential and Public Buildings
2. Prepare Detailed Plans, Elevations, Sections and other working drawings for the buildings.

Assignments:

Following exercises should be drawn on full imperial size drawing sheets.

1. Drawing various types of lines, lettering and symbols of materials, doors and windows etc. used in construction on Full Imperial size drawing sheet.
2. Drawing the lines plans of following buildings on Full Imperial size **graph paper**.
 - Residential Building (Min. three rooms)
 - Public Building – School building, Primary health center / Hospital building, Bank, Post Office, Hostel building etc.(At least four)
3. Measured Drawing of an existing residential Building (Load bearing/ Framed structure Type) , showing Plan , Elevation, Sections, Construction notes, Schedule of openings, Site Plan, Area statement etc .
4. Submission Drawing of two storied residential building (Framed structure type) showing Plans , Elevation, Sections, Foundation Plan ,construction notes, Schedule of openings, Site Plan ,Area statement etc.
5. Working drawing of above drawing sheet preferably one plan, section through stair case to scale 1:50
6. Two point perspective view of a building drawn in submission drawing.
7. Tracing of a submission drawing prepared at Sr. No.4 above.
8. Ammonia print of submission drawing prepared at Sr. No.4 above.

Rationale:

Concrete Technology is a core technology subject of the courses of civil engineering group. Concrete is most widely used construction material in all types of civil engineering structures. Concrete is extensively used in the construction of various kinds of buildings, pavements, bridges, dams, waterways, pipes, water tanks, swimming pools etc. Advances in concrete technology have paved the way to make use of locally available materials by judicious selection of materials, its mix proportioning & proper workmanship so as to result in concrete that satisfies the performance criteria of the structure as per design. i.e. strength, durability and resistance to environmental attack.

Civil engineering technician is to plan, execute the construction work as per drawing, supervise and ensure the quality of final product of concrete it means strength, durability & finish. For effective supervision & quality control of concrete construction at all stages of concrete chain which broadly consists of supply, storage of concrete ingredients, various concreting operations & testing operations before, during & after construction. For this purpose, a civil engineering technician must have good knowledge of the concrete materials (i.e. properties of cement, sand, coarse aggregate water & admixtures.) and the main operations of concreting i.e. selection of materials, its mix proportioning, mixing, placing, compaction, curing & finishing. A technician should acquire the skill of testing, supervision of concrete work & interpretation of tests results.

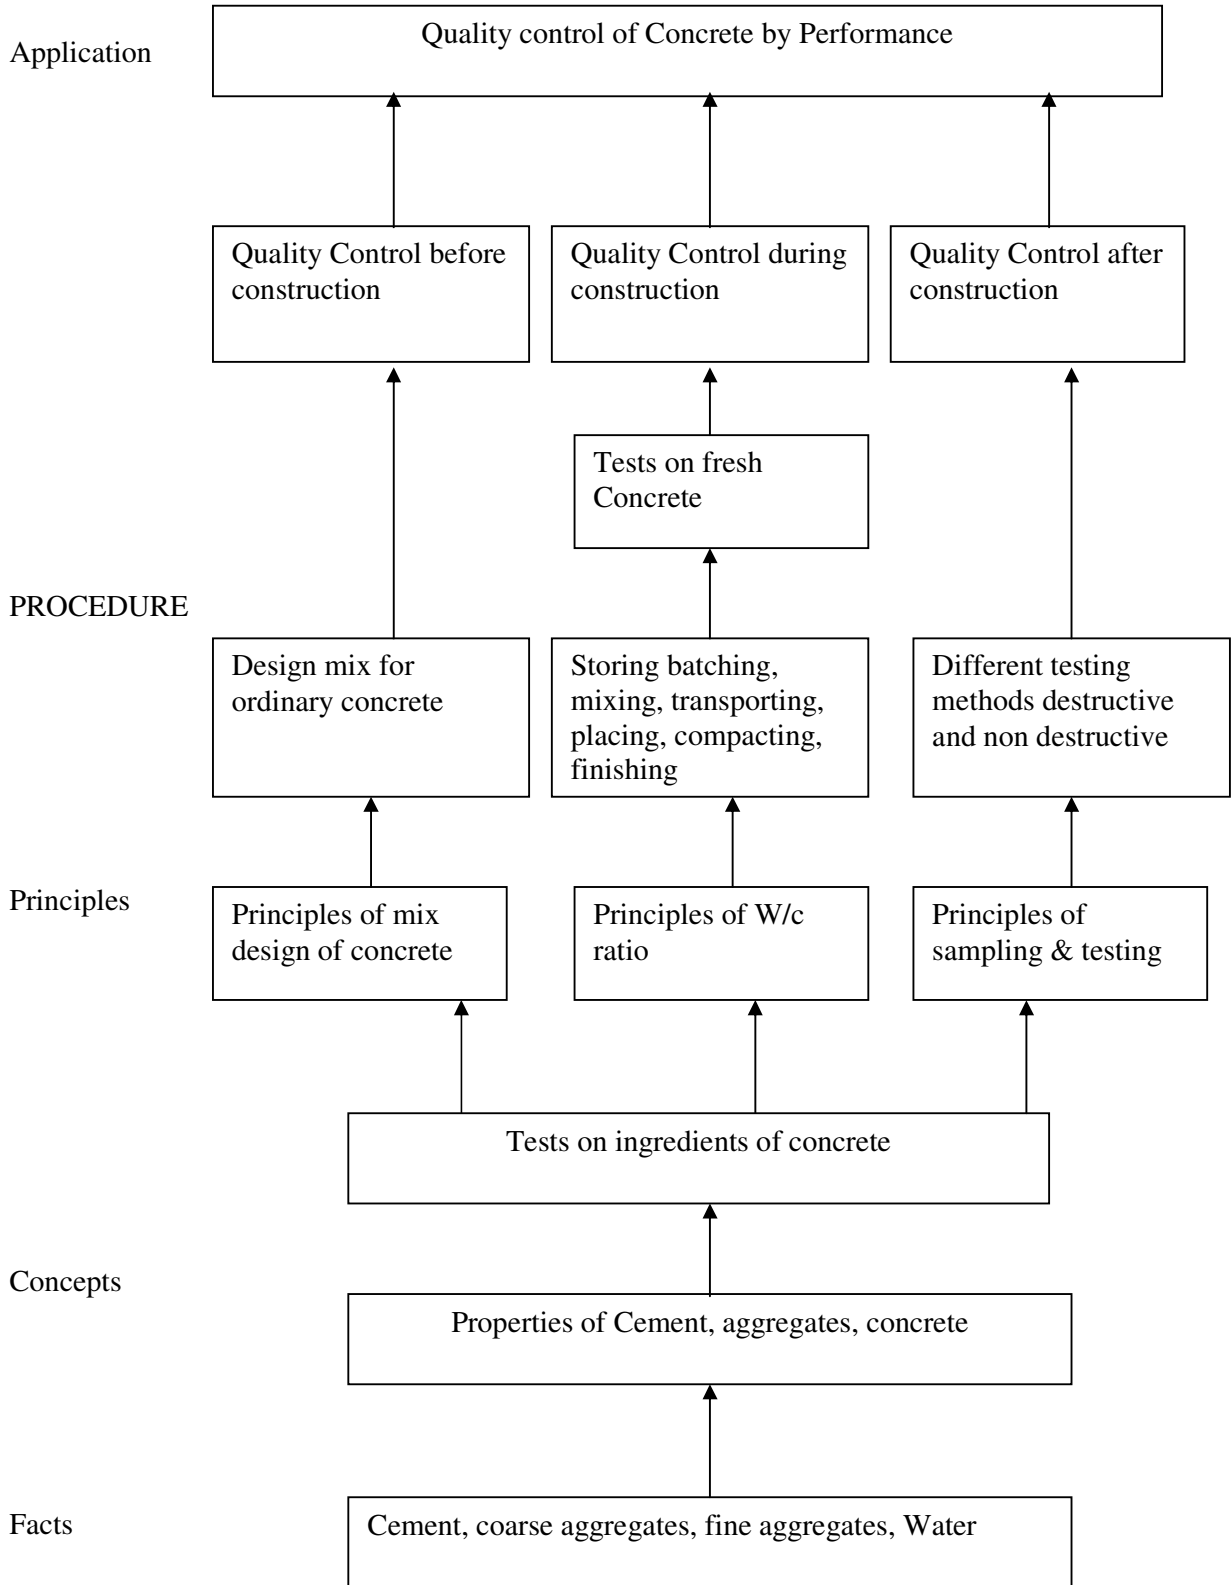

Objectives:

The Students will be able to

1. Determine the properties of concrete ingredients i.e. cement. sand. coarse aggregate by conducting different tests.
2. Use different types of cement as per their properties for different fields applications.
3. Design economic mix proportion for different exposure conditions and intended purposes.
4. Supervise various concreting operations.
5. Carry out field and laboratory tests on concrete in plastic and hardened stage.
6. Use different types of admixtures to improve the properties of concrete for different field applications.

- 7 Describe different types of concrete.
- 8 Infer the test results as per relevant I.S. provisions.

Practical:

Skill to be developed:

Intellectual Skills:

1. Analyze the given data
2. Select proper method for analysis
3. Interpret the results

Motor Skills :

1. Measure the quantities accurately
2. Handle instruments properly

Term work shall consist of eight experiments in part A & mini project work in Part B

Part A: PART A consists of GROUP I & GROUP II.

Group I– Physical tests on ordinary Portland cement (any four)

- 1) Determination of fineness of cement preferably by Blaine’s air permeability apparatus or by sieving.
- 2) Determination of standard consistency of OPC
- 3) Determination of initial & final setting times of OPC.
- 4) Determination of compressive strength of ordinary portland cement
- 5) Determination of soundness of OPC.

Group II – Tests on fine & coarse aggregates (any four)

- 1) Determination of silt content in sand by volume / weight
- 2) Determination of maximum % of bulking of sand
- 3) Determination of aggregate impact value.
- 4) Determination of aggregate abrasion value.
- 5) Determination of aggregate crushing value.
- 6) Determination of bulk density & water absorption, fine & coarse aggregated.

Part B:

Mini Project :

Comparative study of compressive strength of concrete for different Water cement ratio With and without curing.

Note: video cassettes or cd's of above experiments developed by NITTTR (if available) shall be shown to the students on T. V. / L.C.D. projector prior to the conductance of above experiments.

RATIONALE:

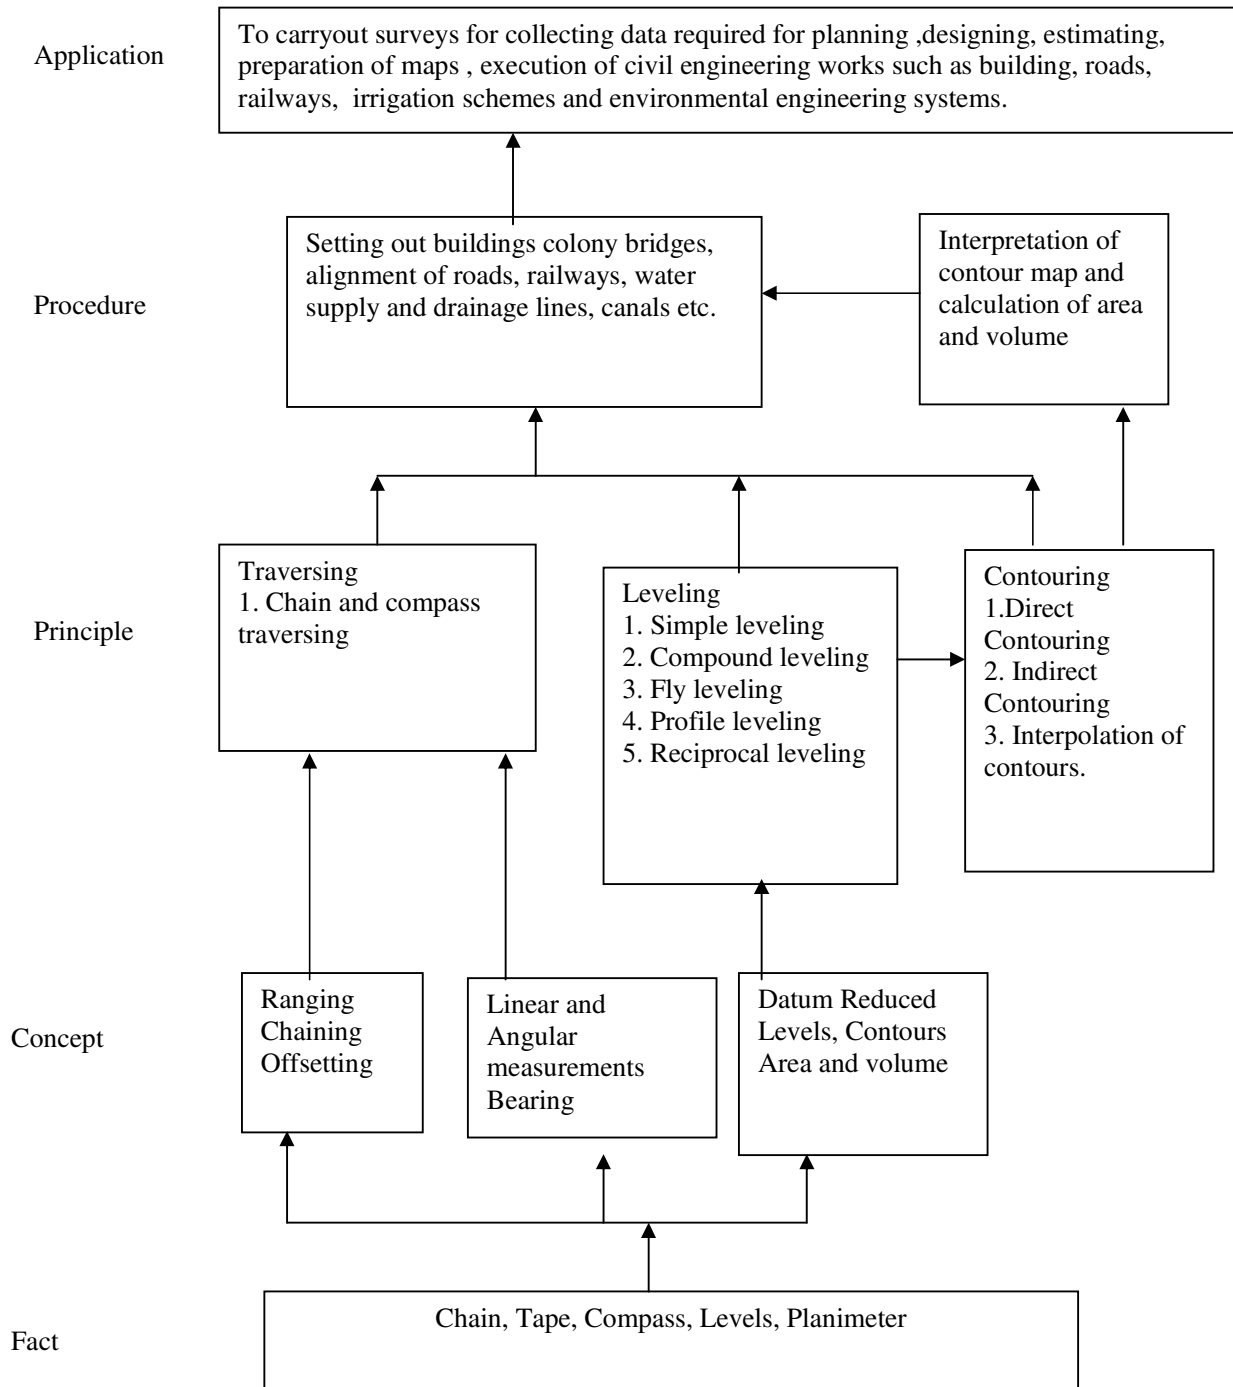

To initiate any Civil Engineering Project in Building Construction System, Irrigation Engineering System and Environmental Engineering System, the knowledge and skill of Surveying is a basic requirement for a Civil Engineer. With this knowledge and skill he will be able to choose appropriate survey and leveling methods, instruments and carry out survey work to prepare required maps. The plans /maps will be further used for designing, estimating and execution of Civil Engineering Works. One should acquire knowledge and develop the skills in surveying.

Objectives:

Students will be able to:

1. use the survey instruments.
2. take linear and angular measurements .
3. measure the area of land .
4. prepare layouts and maps.
5. set out alignments for roads, railways, canals, pipelines, tunnels etc.
6. prepare contour map.
7. compute area and volume from given contour map.

LEARNING STRUCTURE:

Contents: Theory

Chapter	Name of the Topic	Hours	Marks
01	Types of Survey Definition. Objects of Surveying,. Principles of Surveying. Uses of survey, Classification of Surveying. Primary –Plain, Geodetic. Secondary – Based on Instruments, method, object, Nature of field.	04	06
02	Chain & Cross Staff Survey 2.1 Principle of Chain Survey .Study and use of Instruments for linear measurements – chain, Tape, Ranging Rod, arrows, pegs , cross Staff , optical Square , line Ranger. 2.2 Ranging –Direct and Indirect Ranging Chaining – Plain and sloping grounds. Chain Triangulation – Survey Station and their Selections, Survey lines, Check lines, Tie lines, base line. Taking offsets .long and short offset, degree of offset. Obstacles in chaining. 2.3 Chain & cross staff Survey for finding area of a field (Numerical problems) Errors in chain Surveying & applying Corrections for chain & Tape (Numerical problems). Conventional signs related to survey.	08	14
03	Compass Survey 3.1 Principle of Compass Survey. Bearing of lines – Meridian –True, Magnetic, and Arbitrary. Bearing –fore bearing, Back bearing, Whole circle bearing, Quadrantal bearing system and Reduced bearing, Conversion of bearings, finding included angles from bearings. Prismatic Compass – Component, construction and use. Local attraction, Causes, precautions to be taken to avoid and correction of bearings affected due to local attraction, calculation of included angles. Traversing – open traverse, closed traverse, check on open and closed traverse. Graphical adjustment for closing error. Numerical problems on calculation of Bearings, Angles and local attraction.	12	18

04	<p>Levelling Definitions – Level surface, Level line, horizontal line, Vertical line, Datum surface , Reduced level, Bench mark and its types . Dumpy level –Components, Construction, Line of sight, Line of Collimation, Bubble tube axis, leveling Staff – Telescopic and folding type .Foresight, back sight, Intermediate sight, Change point, Height of collimation . Fundamental axes and their relationship Recording in level book. Temporary adjustments of dumpy level. Method of Reduction of levels – Height of instrument method and Rise and fall method. Arithmetical checks, Numerical problems, Computation of missing readings. Classifications of leveling - simple, differential, profile, cross sectional, fly and check levelling. Study and use of tilting level & Auto level. Sources and errors in levelling, precautions and difficulties faced in levelling.</p>	16	24
05	<p>Contouring Definitions – Contour, contour interval, Horizontal equivalent. Characteristics of contours .Method of locating contours. Interpolation of contours. Establishing grade contours. Uses of Contour Maps. Interpretation of Typical Contour Sheets.</p>	04	10
06	<p>AREA AND VOLUME MEASUREMENTS Construction and use of polar planimeter for measurement of area and simple numerical problems. Study and use of Digital Planimete .Concept of computation of Volume by Trapezoidal and Prismoidal formulae.(No numerical problems)</p>	04	08
TOTAL		48	80

PRACTICAL:

SKILLS TO BE DEVELOPED:

INTELLECTUAL SKILLS:

- 1) IDENTIFY THE DIFFERENT INSTRUMENTS FOR LINEAR MEASUREMENT AND LEVELLING
- 2) RECORD AND OBSERVING NECESSARY OBSERVATION WITH THE SURVEY INSTRUMENTS
- 3) CLASSIFY AND DISCRIMINATING VARIOUS TYPES OF SURVEY INSTRUMENTS.
- 4) IDENTIFY THE ERRORS OF THE SURVEY INSTRUMENTS.

MOTOR SKILLS:

1. MEASURE DISTANCES, BEARINGS AND FINDING REDUCED LEVELS WITH SURVEY INSTRUMENTS.
2. PREPARE DRAWING USING SURVEY DATA.
3. PREPARE CONTOUR MAP OF A GIVEN TERRAIN/TOPOGRAPHY.
4. MEASURE AREA OF AN IRREGULAR SHAPE FIGURE WITH PLANIMETER.

INSTRUCTIONS:

1. Group size for Survey Practical work should be maximum 6 Students.
2. Each student from a group should handle the instrument independently to understand the function of different Components and use of the instrument.
3. Drawing, plotting should be considered as part of practical.
4. One full day per project is required for carrying out project work.

TERM WORK SHALL CONSIST OF RECORD OF ALL PRACTICAL AND PROJECTS IN FIELD BOOK AND DRAWING OF PROJECT WORK ON FULL IMPERIAL SIZE DRAWING SHEETS.

1. Measurement of distances with chain & tape on ground with direct or indirect ranging.
2. Construction and use of optical square and open cross staff for setting out perpendicular and running a survey line for locating details.
3. Measurement of Area by Chain and cross staff survey.
4. Use of prismatic compass and observing fore bearing and back bearing.
5. Measuring Fore bearing and Back bearing of 5-6 side closed polygon. Identifying stations affected by local attraction and calculation of corrected F.B. & B.B.
6. Measuring fore bearing and back bearing for an open traverse (5 to 6 sided). Calculate direct angles between successive lines.
7. Use of Dumpy level, temporary adjustments and taking reading on levelling staff. Recording readings in field book.
8. Differential levelling practice, reduction of level by H.I. method.
9. Differential levelling practice, reduction of level by rise & fall method.
10. Carrying Bench mark from one point to another point about 200 m by fly levelling with tilting level.
11. Use of auto level and taking observation.
12. Measurement of Area of irregular figure by polar planimeter.
13. Measuring area enclosed by closed contours on contour map prepared earlier, by simple digital planimeter

SURVEYING PROJECTS:-

1. **Chain & Compass Traverse Survey** – A simple closed traverse of 5-6 sides enclosing a building. Calculation of included angles, locating details and plotting them on A 1 size imperial drawing sheet.
2. **Block Contouring** – A block of 100 x 150m with spot levels at 10x10m plotting the contours on A-1 size imperial drawing sheet with a contour interval of 1m.
3. **Profile levelling survey** – Running a longitudinal section for a length of 500 m for a road /canal /railway alignment. Cross section shall be taken suitably. Plotting plan, L- section and cross section on A1 size imperial drawing sheet.

Rationale:

In today's competitive world, the nature of organizations is changing at very rapid speed. In this situation the responsibility of diploma holder is not unique. He will be a part of a team in the organization. As such the individual skills are not sufficient to work at his best.

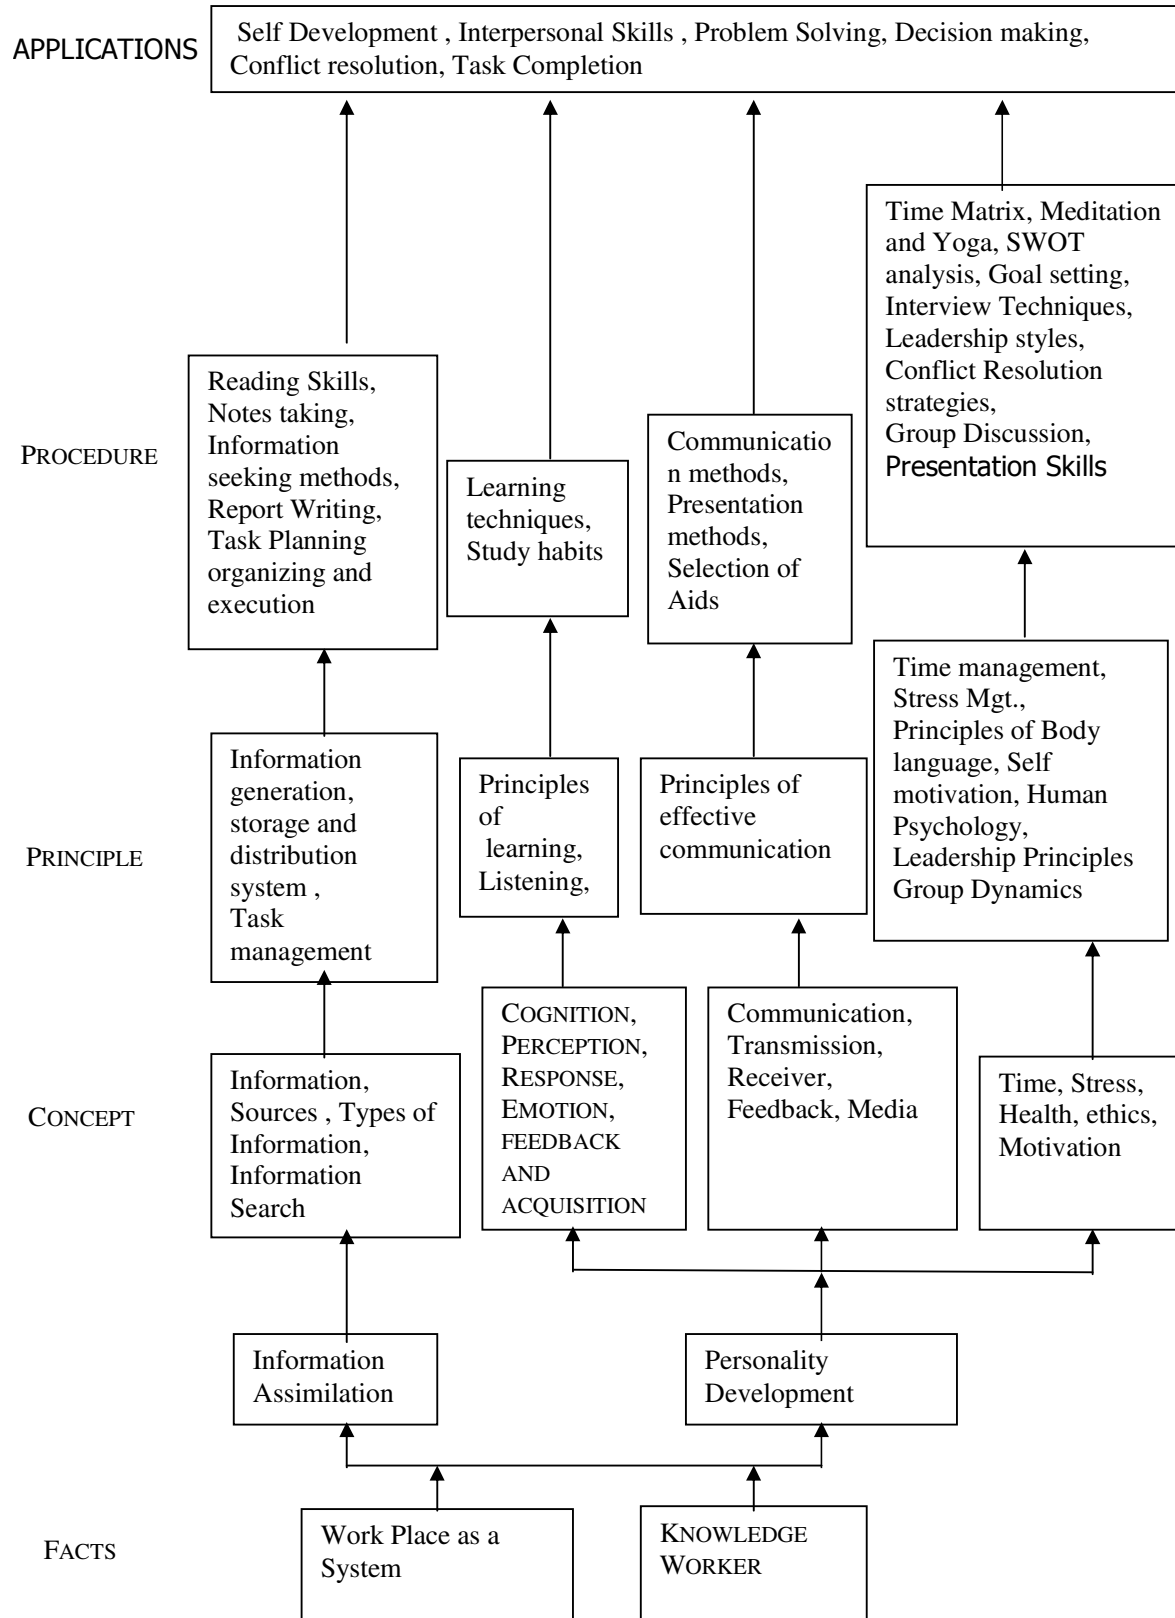

This subject will develop the student as an effective member of the team. It will develop the abilities and skills to perform at highest degree of quality as an individual as well as a member of core group or team. Such skills will enhance his capabilities in the field of searching, assimilating information, managing the given task, handling people effectively, solving challenging problems .

THE SUBJECT IS CLASSIFIED UNDER HUMAN SCIENCE.

OBJECTIVES: THE STUDENTS WILL BE ABLE TO:

1. Developing working in teams.
2. Apply problem solving skills for a given situation.
3. Use effective presentation techniques.
4. Apply techniques of effective time management.
5. Apply task management techniques for given projects.
6. Enhance leadership traits.
7. Resolve conflict by appropriate method.
8. Survive self in today's competitive world.
9. Face interview without fear.
10. Follow moral and ethics.
11. Convince people to avoid frustration.

List of Assignment: (any eight assignments)

- 1) SWOT analysis:- Analyse yourself with respect to your strength and weaknesses, opportunities and threats. Following points will be useful for doing SWOT.
 - a) Your past experiences,
 - b) Achievements,
 - c) Failures,
 - d) Feedback from others etc.
- 2) Undergo a test on reading skill/memory skill administered by your teacher.
- 3) Solve the puzzles.
- 4) Form a group of 5-10 students and do a work for social cause e.g. tree Plantation, blood donation, environment protection, camps on awareness like importance of cleanliness in slump area, social activities like giving cloths to poor etc.(One activity per group)
- 5) Deliver a seminar for 10-12 minutes using presentation aids on the topic given by your teacher.
- 6) Watch/listen an informative session on social activities. Make a report on topic of your interest using audio/visual aids. Make a report on the programme
- 7) Conduct an interview of a personality and write a report on it.
- 8) Discuss a topic in a group and prepare minutes of discussion. Write thorough description of the topic discussed
- 9) Arrange an exhibition, displaying flow-charts, posters, paper cutting, photographs etc on the topic given by your teacher.

Note: - Please note that these are the suggested assignments on given contents/topic. These assignments are the guide lines to the subject teachers. However the subject teachers are free to design any assignment relevant to the topic. The **term work** will consist of any eight assignments.

MINI PROJECT ON TASK MANAGEMENT. DECIDE ANY TASK TO BE COMPLETED IN A STIPULATED TIME WITH THE HELP OF TEACHER. WRITE A REPORT CONSIDERING VARIOUS STEPS IN TASK MANAGEMENT.

Rationale:

Most of the diploma holders join industries. Due to globalization and competition in the industrial and service sectors the selection for the job is based on campus interviews or competitive tests.

While selecting candidates a normal practice adopted is to see general confidence, attitude and ability to communicate and attitude, in addition to basic technological concepts.

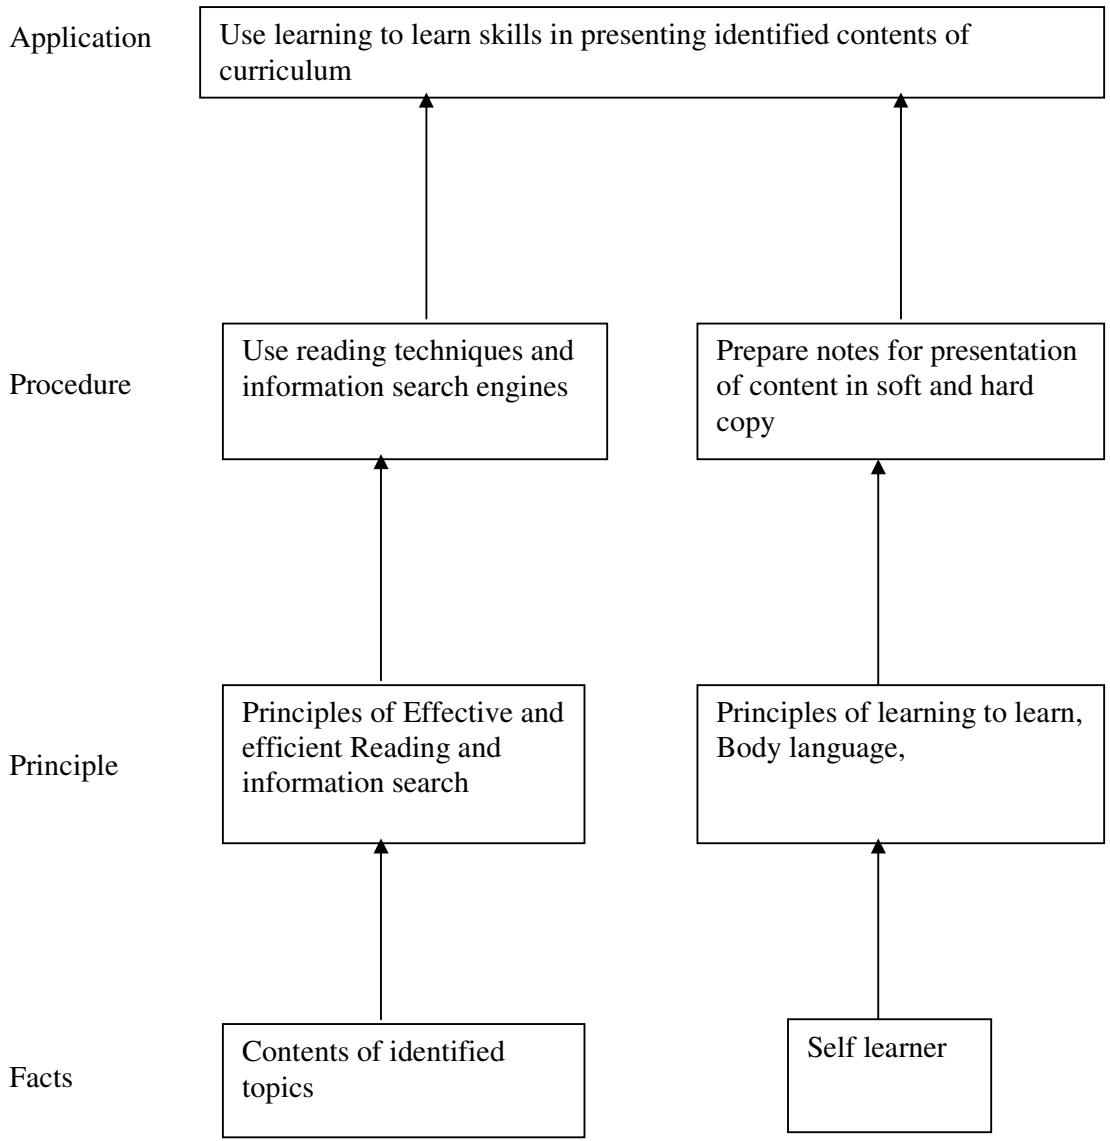

The purpose of introducing professional practices is to provide opportunity to students to undergo activities which will enable them to develop confidence. Industrial visits, expert lectures, seminars on technical topics and group discussion are planned in a semester so that there will be increased participation of students in learning process.

Objectives:

Student will be able to:

1. Acquire information from different sources
2. Prepare notes for given topic
3. Present given topic in a seminar
4. Interact with peers to share thoughts
5. Prepare a report on industrial visit, expert lecture
